FLY FISHERS
Fly Fishers is a web application developed for easing out the activities performed at fisheries department. This application is helpful for fishermen and fisheries department to access information regarding weather, trolling, license updating. Fishermen use this facility for learning different information and they can use this application to request for various services such as licensing, verification, compensation, etc.We can access any information about the fisheries department and we can know about thefishing information using through the chatbot.

INDOOR AIRPORT
In recent smartphones and tablets, applications which provide an accurate navigation system are most frequently used.These applications make use of GPS to provide a better navigation to the user with accurate location of the user. Butthese navigation systems to be used inside a closed building is still a challenge due to the unavailability of GPS signals The QR code is a 2D code that contains the location information which provide a better navigation inside the building.

Hereby declare that all above information is true to best of my knowledge
